## **Final Proposal Revision**

**To:**

**Attention: Antonio L. Leathers  
U.S. Environmental Protection Agency  
RTP Procurement Operations Division (D143-01)  
4930 Old Page Road  
Durham, NC 27703**

**Submitted by:**

**Battelle  
505 King Avenue  
Columbus, OH 43201-2696**

**September 6, 2012**

This proposal is the proprietary and confidential information of Battelle. This proposal includes data that shall not be disclosed outside the Government and shall not be duplicated, used, or disclosed— in whole or in part— for any purpose other than to evaluate this proposal. If, however, a contract is awarded to this offeror as a result of—or in connection with—the submission of this data, the Government shall have the right to duplicate, use, or disclose the data to the extent provided in the resulting contract. This restriction does not limit the Government's right to use information contained in this data if it is obtained from another source without restriction. The data subject to this restriction are contained in marked sheets herein.

**Interrogatory Questions for Battelle Memorial Institute****Table of Contents**

List of Tables and Figures	ii
Question 1	1-01
Question 2	2-01
Question 3	3-01
Question 4	4-01
Question 5	5-01
Question 6	6-01
HPL Profile	P-01

### List of Tables

Table 1-1	Correlation between CFR Parts 50, 53, and 58 and the Most Relevant Statement of Work (SOW) Task Areas	1-04
Table 2-1	Summary of Audit Activities Required by 40 CFR Part 58 Appendix A	2-02
Table 4-1	The Battelle Team Provides Support Related to Electronic Systems Guidance Documents and Technical Reports	4-06
Table 6-1	Summary of Audit Activities Required by 40 CFR Part 58 Appendix A	6-02

### List of Figures

Figure 4-1	An example GoogleEarth view of a T-SpACE surface file	4-03
Figure 4-2	The Battelle Team understands the vital role metadata serve in realizing the value, discovery and defensible (reuse of environmental observations (Source: First U.S. COOS Development Plan 2006)	4-07
Figure 4-3	T&B metodes metadata in their internal data display system and can prepare submissions in many formats to meet OAQPS's needs	4-08
Figure 4-4	Battelle developed an easily configurable, secure, modular, integrated, open-source QMS IMS that will meet the needs of OAQPS to effectively manage and track the activities of Task 3	4-10
Figure 4-5	Illustration of TCOIS QMS IMS that Battelle currently utilizes for document training, audit, and corrective action/preventive action (CAPA) tracking	4-11
Figure 4-6	Example of a screenshot of Visual Sample Plan (VSP), an analytical tool developed internally for implementing the DQO Process to environmental monitoring programs	4-17
Figure 4-7	Battelle's DQO Companion software is used to select a sampling plan that meet criteria on decision errors in support of setting standards for particulate matter	4-18
Figure 4-8	Through software such as Visual Policy Analyzer, the Battelle Team has developed state of the art data visualization tools which EPA has used successfully to characterize impacts of various options for setting regulation	4-21
Figure 5-1	Battelle's analysis of historic proficiency test data from the NATTS program suggested that the MOO for laboratory bias should be revised to be analyte-specific and should utilize the overall lab average as the true value for a batch of proficiency test samples	5-02
Figure 5-2	Assessment of Relative Percent Difference measures (min/max/median/mo/ho/mo) across sites with duplicate samples collected in the NDAMN program	5-04
Figure 5-3	Example of a control chart with warning limits (purple lines) and control limits (red lines) used by Battelle on a recent laboratory study	5-07
Figure 5-4	Battelle has authored three Quality Assurance Annual Reports for the NATTS Program	5-08
